ABSTRACT

This modern era most child teenager more comfortable for hid the problem alonethan have to tell the problem with his parents. Study this motivated by lack of communication among children and parents in Indonesia who can impact on the occurrence obstacle mental development of the child. Phenomenon the is effect from the advancement of mass media and the lack of attention between parents to his son. Many parents feel he knows very well her son even though they not enough know him because no the opening among children and parents. Responding to thing the need wish conducted study to use knowing factor blocker parent communication to child. Teenager is a critical time because faced with various duty development which is transition going to adult, Importance role of parents in development potency child can started since child still age early. Study this aim for knowing how far is the relationship among effectiveness parent communication to intrapersonal personality of children who have happen.

INTRODUCTION

Communication for man is most basic needs in live, almost whole activity man in life personal and social no can inseparable from communication, so man no could live and thrive without communicate. (Mardah, 2021). Communication is very important for life human, so stated "communication is the essence of human life", statement this confirm that without effective communication, sustainability life man will disturbed, even in connection life family. (Rusdiana, 2021).

Teenager are the times where our feel surrender because faced with various duty development which is state going to mature. Failure teenager in reach duty development make teenager susceptible experience disturbance psychology (Endah Mujahidah & Ratih Arruum Listiyandini, 2018). Not all teenager succeed pass tasks development with well, even they start experience various event a life that doesn't wearing. Transition at the time teenager could in crease relevance problem mental health, wrong stunya is experience depression. (Annisa Axelta & Fitri Ariyanti Abidin, 2022). Wrong one influencing factors regulation emotion is relationships that develop between people old and teenagers as consequence from intraction. Wrong one reason emergence lonely is no ful fill men needs for relate with person another. In adolescence needs influenced by parents and peers (indra & dwi rahmadani, 2019).

Child mental factor disturbed could from family ieincludes parenting person old that is communication built between people old and child as well as proximity child to people old (chairunnisa djayadin &

erni munastiwi, 2020). Lots teenagers who experience symptom depression. And communication that is not effective in family resulted no ability in work basics communication in teenagers because no the reis good and supportive social environment in field communication Teenagers also tend to will experience disturbance communication that can cause depression (Iis Rudiana & Mukhripah Damayanti, 2019). Person old who can communicate effectively, can he consider as friends and will make warm life in family, so relationship between people old and child have openness and mutual give (alma rozana, nurhalimah tambunan, munisa, 2019).

METHODS

Before ongoing activity pkm we do a field survey for observe environment Nusantara Islamic Bakti Vocational School which is located on JL. Raya Crackle KM 11 Ds Rengat district. Kresek Kab. Planned Tangerang-Banten 15620 as object goal, step then we submit a proposal and a letter application to party school for determine deal about when time and place conducted activity counseling. After party school we are willing to do activity PKM head school will Secrete letter reply, on the day implementation our activities bring document supporters in the form of personal cv, profile cv campus, material presentations, minutes, and letters task. Ongoing activity devotion to public this done by students STIKes Faathir Husada semester 2. Activities PKM socializing done is in the form of theory about poor parental communication effective could affect children's mental, activities this held for fulfill duty eye studying communication nursing as well as increase understanding to Bakti Islam Nusantara Vocational High School students.

Counseling materials this conducted in the form of lecture about poor parental communication effective could affect children's mental, material counseling this given in form of power point after done gift theory participant PKM given opportunity for discussion and session ask answer as well as students given pre-test and post-test.
